

Water supply and sewerage systems

Toruń is supplied with water by the Toruń Waterworks Company Ltd. (Toruńskie Wodociągi Sp. z o.o.). The Company maintains also the sewerage system and sewage treatment plants. The city is supplied with water from the following intake stations, covering 100% of demand of the city:

- a surface intake station on the Drwęca river
- an infiltration intake station in Jedwabno
- a land intake station in Mała Nieszawka
- a land intake station in Wrzosey
- a land intake station in Czerniewice.

>>> The water supply and sewerage emergency (opened 24/7) - phone number: **994**
