

CoCArt Music Festival

The festival takes place at the Modern Art Centre since 2008. The first edition was organised before the official opening of the facility. The main objective of organisers is to present new trends in contemporary audio and visual arts, in the atmosphere of mutual understanding and complementarity.

During the international event, there are multimedia concerts presented by artists integrating music, image and performance art. The festival presents mainly artists working actively in the field of experimental dance music, ambient, drone music, postindustrial, free improvisation and field recordings. Audiovisual concerts are the most important part of the festival.

Organiser: the "Znaki Czasu" Modern Art Centre.
